

## **Fourth Grader to create alternative Fuel**

Ethan Schnellinger, a 4<sup>th</sup> grader at Temple Beth Emet Day School, won First prize in the CAJE Tri-County science fair.

In his project “Which Type of Yeast will create the most Ethanol?” Ethan showed how a reaction between yeast and cranberry juice creates Ethanol and CO<sup>2</sup>.

“When I made Ethanol in the bottles, I also made CO<sup>2</sup> which made some of the balloons pop”.

In the Photo: Ethan (9 from Davie) with his project.

Temple Beth Emet Day School is located at 4807 South Flamingo Road,  
Cooper City, FL 33330.
